

To Whom It May Concern,

I am writing to highly recommend Gaurav Ghati based on his outstanding contributions during his time at Bank of New York Mellon, Pershing. Gaurav's proficiency in Java SpringBoot was pivotal in developing our electronic signature software. His backend expertise ensured the software's reliability and efficiency, allowing BNY Mellon's clients to sign documents digitally.

Gaurav's strength in databases and SQL was evident as he seamlessly integrated these elements into our projects. He consistently demonstrated effective communication, enhancing collaboration within the team and facilitating interactions with his seniors.

During his tenure, Gaurav significantly increased code coverage by approximately 60% through his adept use of JUnit and Mockito. His commitment to security was evident in resolving over 100 Software Composition Analysis and vulnerabilities issues, further showcasing his dedication to quality.

Gaurav embraced agile methodologies, incorporating CI/CD and Test-Driven Programming to elevate our development process. He consistently harnessed core computer science fundamentals to address complex challenges and exhibited exceptional debugging skills to ensure smooth operations.

In conclusion, Gaurav Ghati's technical expertise, dedication, and problem-solving abilities make him an exceptional asset. I am confident he will excel in any role he undertakes. Please feel free to reach out to me at [jcalapatia@albridge.com](mailto:jcalapatia@albridge.com) for any further information.

Best regards,

*Jonathan Calapatia*
