### Letter of Recommendation

To Whom It May Concern,

I am very pleased to write this letter for recommending **Mr. Gaurav Ghati** for the masters program at your university. I taught him **Database Management Systems (DBMS)** and **Cloud Computing** in the 5th and 6th semester respectively wherein I observed that he can grasp new concepts with relative ease and can articulate his thoughts in a well-defined manner. He never hesitated in raising queries and clearing the doubts pertaining to the topics that I taught him. The interactions made me notice that he is very well-mannered and respectful to all his lecturers.

Over the couple of years, I found Gaurav very interactive during the course, often he was the first one to solve the assignments and quizzes. This shows his sincerity, regularity and especially, his determination towards studies. He has personally taken initiatives to clear other subjects' doubts and found alternative ways to get to a solution. Personally, I found him very capable to work in teams in the group project or assignment. He was able to cleverly distribute the tasks among his group members according to their skill sets. I have also seen him work very hard even for trivial tasks.

Setting aside academics, Gaurav also involved himself in extracurricular activities and did a commendable job. He was a part of PICT IEEE Student Branch (PISB) where he contributed towards making Credenz (our biggest annual tech festival) a highly successful festival by building and organizing various technical events. He showed excellent leadership skills by leading his juniors in the PISB as a technical head in the year 2021. He was successfully able to perform well in both academics and extracurricular activities.

Considering his exploring behavior and interest towards Computer Science, pursuing higher studies is a right decision for him. I am certain that he bears all the skills and qualities to be a highly capable student at your institution. I'm sure, with his well-rounded personality he'll make a significant impact like he had done on Pune Institute of Computer Technology. Hence, I strongly recommend him for the master's program at your prestigious university.

For any further queries, please feel free to contact me.

Your Sincerely,

Dr. Emmanuel M.

Professor,

Department of Information Technology,

Pune Institute of Computer Technology, Pune, India
