To Whom It May Concern,

I feel delighted to recommend **Gaurav Ghati**, as a prospective candidate for the Software Engineer position at your company. I know him in the capacity of his 2022 senior year project supervisor. I have found that he has a potential to work on innovative and challenging problems. The interaction that I had with him during that time has led me to believe that he is highly committed to his work. I am impressed by his enthusiasm, intelligence, strong dedication and passion towards his work and his strong inclination towards innovation.

Gaurav completed his senior year project "Technology Assisted Review (TAR) 2.0" under my guidance over the period of 10 months from August 2021 to May 2022. During this period, he demonstrated good analytical ability while understanding the problem statement. He researched and implemented the method of continuous active learning in the project which significantly improved the overall accuracy. This work is appreciated at every level. Moreover, we have written a research paper titled "A Transformer Based Approach For TAR 2.0" which got accepted at IEEE International Symposium on Technologies for Homeland Security. However, at the moment we are keen on finding a better solution and publishing our best work at a better conference.

On a personal level, Gaurav is a well-disciplined research student with a pleasant personality. He is always inquisitive and has a relentless desire to learn in depth about the various aspects of Computer Science and Engineering.

I strongly recommend Gaurav and I sincerely believe that he will prove to be a valuable asset for your organization.

Please feel free to contact me in case you have any queries.

Sincerely,

Vishrut Goyal
Technical Director,
Data Compliance and Governance,
Veritas Technologies LLC
