Letter Of Recommendation

To Whom It May Concern,

I am delighted to recommend **Mr. Gaurav Ghati** in support of his Master's program in Computer Science at your university. I have known him since 2018 when he started his undergraduate program in the department of Information Technology. He has taken two classes under me - **Computer Network Technology** and **Information and Cyber Security**. During this time, I got the privilege to observe and assess his professionalism and intellectual ability. He had excellent responses in the class due to his outstanding work ethics. He was an experimental learner with advanced technical skills.

During the classes, I have observed his ability to grasp the concepts very quickly and provide real world use-cases of the same. Even though he was just a student, he had exhibited all the qualities of a competent professional, being a consummate multitasker, he had showcased his mettle for numerous critical tasks. During the classes there were many group presentations conducted where his passion, intellect could be seen through his presentations. His methodological approach, interest and knowledge about the subject has placed him among the top 10% in semester-end exams.

I firmly believe that Gaurav fulfills all the requirements of this Master's program. During the two semesters of our interaction, he had exhibited profound skills including time management, good listening, leadership, good cooperation, and had demonstrated responsible behavior. I had seen him lead the group of other students during group assignments and not only did he learn himself but also took efforts in helping other students master the concepts.

Gaurav always had a positive attitude and shared a good rapport with his fellow classmates. He is an ambitious individual who willingly takes initiative and personally overlooks strategies for the success of a particular work. I am poised and positive that he holds the credentials and capacities to join your eminent Master's program as he has that required confidence in his fundamental concepts of technical and leadership skill. Your program will not only help him unleash his latent potential but will also provide significant leverage to his career. Individuals with his caliber deserve to be part of your university. Hence, I strongly recommend Gaurav's candidacy for your prestigious Master's program.

With Regards,

Mr. Tushar Rane
Assistant Professor,
Department of Information Technology,
